

COVID-19 COMMUNITY VACCINE UPDATE

Emergency Hospital Systems is excited to announce that our COVID-19 vaccine application with the state has been approved! Although this has been a complicated process, we have been planning and taking the necessary steps to ensure that our staff and community receives the vaccine.

We expect to receive our first shipment within the next two weeks; however, we do not know the number of allocated vaccines or type of vaccines that we will receive. Emergency Hospital Systems will prioritize and administer the first doses to our frontline and essential workers within our organization. Once we have completed those immunizations, we will begin prioritizing the at-risk groups in our community in accordance with the Texas COVID-19 Vaccination Plan and begin the vaccination process.

As more information becomes available, we will continue to communicate with the community regarding scheduling a vaccination. Currently there are no pre-scheduled appointments for any COVID-19 vaccines.

We would encourage you, if you have not received your flu shot, please do so! It is especially important this year to protect your immune system. If you are experiencing a medical or life-threatening condition, please do not delay medical care and visit one of our hospitals or emergency rooms.

With the recent uptick of positive COVID-19 cases in our community, we continue to encourage everyone to wear a face covering, practice social distancing and proper hand hygiene.

Thank you for your continued support for Emergency Hospital Systems!
Wishing you a Happy and Healthy New Year!
